

Rishabh Gupta

Rishabhgupta26225@gmail.com — (+91) 9473570382 — GitHub — LinkedIn — Leetcode

Professional Summary

Computer Science Engineering student skilled in Java, Python, MERN Stack, and Machine Learning. Experienced in developing AI-powered and full-stack applications with a strong foundation in Data Structures, Algorithms, and problem-solving.

Technical Skills

Languages: Java, Python, JavaScript, SQL

Web & Database Technologies: HTML, CSS, React.js, Node.js, Express.js, MongoDB, MySQL, REST APIs, Flask

Machine Learning & AI: NumPy, Pandas, Scikit-learn, TensorFlow, OpenCV, Regression, Classification, Random Forest, XGBoost, Feature Engineering, Cross Validation, Model Deployment, Matplotlib, Seaborn

Tools & Platforms: Git, GitHub, Docker, Postman, Jupyter Notebook, Kaggle, Streamlit, OpenAI API, CI/CD

Experience

- Web Developer Intern

May 2026

InAmigos Foundation

- Developed 10+ responsive UI components using React.js, HTML, CSS, and JavaScript.
- Optimized frontend performance and improved user experience through component-level enhancements.
- Collaborated with a remote development team to implement features, resolve UI bugs, and support project delivery.

Projects

- **AI Attendance System** GitHub *Python, OpenCV, NumPy, Pandas* — Mar 2025
 - * Developed a face-recognition attendance system using Python, OpenCV, and NumPy to automate attendance tracking.
 - * Implemented real-time facial recognition and image processing techniques for accurate user identification.
 - * Automated attendance record management using Pandas and CSV-based data processing.
- **AI Gym Coach** GitHub *Python, OpenCV, TensorFlow, MediaPipe* — Apr 2025
 - * Developed an AI-powered fitness coaching application using Python, OpenCV, TensorFlow, and MediaPipe.
 - * Implemented real-time pose estimation and body landmark tracking for exercise monitoring.
 - * Built posture correction and repetition counting features using computer vision and deep learning techniques.
- **Smart Campus Management System** GitHub *MongoDB, Express.js, React.js, Node.js* — Jan 2026
 - * Developed a full-stack campus management system using the MERN stack for student and event management.
 - * Built RESTful APIs and implemented JWT authentication for secure user access and data management.
 - * Designed responsive dashboards with CRUD functionality for managing records and campus activities.
- **Airbnb Clone Website** GitHub *HTML, CSS, JavaScript, Node.js, MongoDB* — Jun 2025
 - * Developed a responsive Airbnb-style booking platform using Node.js, Express.js, MongoDB, HTML, CSS, and JavaScript.
 - * Implemented dynamic property listings, search, filtering, and booking functionalities.
 - * Built backend APIs and integrated MongoDB for efficient user and property data management.

Education

- **Parul University** 2023 – 2027
B.Tech in Computer Science Engineering CGPA: 7.4

Achievements

- Secured 2nd Place in Sustain Tech Hackathon among 200+ participating teams.
- Solved 250+ Data Structures and Algorithms problems on LeetCode and GeeksforGeeks.
- Developed 9+ AI/ML and Full Stack projects using Python, TensorFlow, React.js, Node.js, and MongoDB.
- Maintained an active GitHub portfolio showcasing Machine Learning, Computer Vision, and MERN Stack applications.
