Professional Summary

Computer Science undergraduate skilled in MERN stack development, REST APIs, and backend systems. Experienced in building scalable full-stack projects, implementing authentication, and automating workflows using CI/CD pipelines. Passionate about software development, problem-solving, and modern web technologies.

Skills

- **Languages:** Java, Python, JavaScript
- **Web Development:** HTML, CSS, React.js, Node.js, Express.js
- **Backend:** REST API Development, JWT Authentication, CRUD Operations
- **Databases:** MongoDB, SQL
- **Tools:** Git, GitHub, GitHub Actions, Docker, Postman, CI/CD

Education

Parul University	2023 – 2027
B.Tech in Computer Science	CGPA: 7.4

Projects

Smart Campus Management System

- Built a full-stack campus platform using MongoDB, Express.js, Node.js, and JavaScript.
- Developed 15+ REST APIs for student management, authentication, and events.
- Managed 500+ student records and 20+ campus events via centralized dashboard.
- Implemented JWT authentication and CI/CD pipeline using GitHub Actions.
- Secured 2nd place among 50+ teams in Sustain Tech Hackathon.
- **GitHub:** [Link](#)

Airbnb Clone Website

- Developed a responsive Airbnb-style booking platform using HTML, CSS, and JavaScript.
- Added dynamic property listings, filtering, and search functionality.
- Improved responsiveness across desktop and mobile devices.
- **GitHub:** [Link](#)

Gaming Event Management Website

- Built a tournament platform using MongoDB, Express.js, and Node.js.
- Designed and tested 10+ REST APIs with JWT authentication and CRUD operations.
- Improved backend request handling and API testing using Postman.
- **GitHub:** [Link](#)

Zerodha Clone (React)

- Designed a responsive stock trading interface using React and Bootstrap.
- Built 12+ reusable React components for scalable frontend development.

Achievements

- Secured 2nd Place in Sustain Tech Hackathon (2026) among 50+ teams.
- Built a sustainability-focused solution within a 12-hour hackathon.
