Professional Summary

Computer Science undergraduate passionate about Frontend Engineering, AI-powered applications, and Developer Tools. Hands-on experience building responsive user interfaces and full-stack applications using React.js, JavaScript, TypeScript, Node.js, and REST APIs. Strong understanding of web application architecture, component-based design, UI/UX principles, frontend performance optimization, and software engineering fundamentals.

Experience

Co-Founder & Backend Developer — CodeMintX

Jan 2025 – Present

- Founded and led a team of 7 developers to build and scale an AI-powered EdTech platform.
- Developed full-stack applications using MERN Stack, Python, AWS, and Docker.
- Deployed cloud-native infrastructure with CI/CD automation, serving 100+ active users.
- Implemented coding contests, AI learning modules, authentication systems, and analytics dashboards.
- Collaborated with developers to design scalable architectures and improve platform reliability.

Web Developer Intern — InAmigos Foundation

May 2026 – Present

- Developed and maintained 10+ reusable React.js components, improving UI consistency and user experience.
- Collaborated with developers to implement new features, troubleshoot issues, and optimize application performance.
- Participated in testing, debugging, and deployment activities following software engineering best practices.
- Built responsive web interfaces compatible across multiple browsers and devices.

Projects

Zerodha Clone — GitHub

May 2026 – Present

- Developed a full-stack stock trading platform with authentication, portfolio management, and trading dashboards.
- Built RESTful APIs for user accounts, transactions, and portfolio operations.
- Implemented secure authentication and authorization mechanisms.
- Designed responsive dashboards for watchlists, holdings, positions, and order management.
- Integrated MongoDB for efficient storage and retrieval of application data.

AI-Powered Text Summarizer — GitHub

May 2026 – Jun 2026S

- Developed a text summarization application using FastAPI and Transformer-based models for generating concise summaries.
- Built RESTful APIs for real-time text processing and model inference.
- Implemented preprocessing, tokenization, and sequence generation pipelines to improve summary quality.
- Integrated GPU-accelerated inference to reduce latency and improve scalability.
- Designed a responsive frontend using HTML, CSS, and JavaScript.

WanderLust – Accommodation Booking platform — GitHub

Jul 2025 – Sep 2025

- Developed a full-stack accommodation booking platform inspired by Airbnb.
- Implemented property listings, search, filtering, and booking workflows.
- Designed backend APIs and integrated MongoDB for user and property management.
- Built responsive user interfaces and optimized database operations.

AI Attendance System — GitHub

May 2026 – Present

- Built a real-time face recognition system using Haar Cascade classifiers and LBPH recognizer for automated attendance tracking.
- Processed live video streams at 30 FPS with sub-second latency and registered 50+ users with automated CSV-based attendance logging.
- Implemented face detection, identification, timestamp generation, and record management workflows for end-to-end attendance automation.
- Eliminated manual attendance processes by enabling fully automated detection, recognition, and attendance record generation.

CodeMintX — EdTech Platform

Jan 2025 – Present

- Built and deployed a MERN-based coding platform with AI-driven learning modules and coding battles.
- Served 100+ active users and improved coding practice efficiency by 35%.
- Implemented authentication, dashboards, coding contests, and course management systems.
- Deployed successfully on AWS cloud infrastructure for scalable and secure access.

Technical Skills

Programming Languages: Java, Python, JavaScript, SQL

Core Computer Science: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Frontend Development: React.js, Next.js(Basic), HTML5, CSS3, JavaScript, TypeScript(Basic), Tailwind CSS, Bootstrap, Responsive Design, Component-Based Architecture, UI/UX Development, Frontend Performance Optimization

Backend Development: Node.js, Express.js, FastAPI,Flask, REST APIs, JWT Authentication

Databases: MongoDB, MySQL

Tools & Platforms: Git, GitHub, Docker, Linux, Postman, AWS, CI/CD, Kubernetes, Jupyter Lab

AI & Machine Learning: NumPy,Pandas,Sklearn, PyTorch, TensorFlow, Hugging Face Transformers, Machine Learning, Deep Learning, LLM

Education

Parul University, Gujarat	Aug 2023 – Present
B.Tech in Computer Science Engineering	CGPA: 7.4/10

Achievements

- Solved 400+ Data Structures and Algorithms problems on LeetCode and GeeksforGeeks.
- Winner in Sustain Tech Hackathon among 500+ participating teams.
- Built and deployed 10+ software engineering, AI, and full-stack projects.
- Maintained an active GitHub portfolio showcasing backend, full-stack, and AI applications.
