Professional Summary

Computer Science undergraduate passionate about AI/ML, Full-Stack Development, and Software Engineering. Hands-on experience building AI-powered applications and scalable web applications using Python, Java, JavaScript, React.js, Node.js, Express.js, MongoDB, and REST APIs. Strong understanding of machine learning, web application architecture, database design, and software engineering principles, with a passion for solving real-world problems through technology.

Education

Parul University, Gujarat

Aug 2023 – Present

B.Tech in Computer Science Engineering

CGPA: 7.6/10

Experience

Web Developer Intern — InAmigos Foundation

May 2026 – Present

- Developed 10+ Reusable React.js Components, improving UI Consistency and User Experience.
- Collaborated on Feature Development, Debugging, and Performance Optimization.
- Built Responsive Web Interfaces and participated in Testing and Deployment following Software Engineering Best Practices.

Projects

ResumeFit-AI — GitHub

May 2026 – Present

- Developed an AI-powered Resume ATS Analyzer using Python, Streamlit, and Google Gemini API.
- Analyzed resumes against job descriptions to generate ATS scores, identify missing keywords, and provide AI-based improvement suggestions.
- Built a user-friendly interface for PDF resume upload and instant resume analysis.

WanderLust – Accommodation Booking platform — GitHub

Jul 2025 – Sep 2025

- Developed a Full-Stack Accommodation Booking Platform inspired by Airbnb.
- Implemented Property Listings, Advanced Search, Filtering, and Booking Workflows.
- Designed RESTful APIs and Integrated MongoDB for efficient User, Property, and Booking Management.
- Built responsive User Interfaces and Optimized Database Operations to enhance application performance.

AI Attendance System — GitHub

May 2026 – Present

- Developed a Real-Time Face Recognition Attendance System using Python, OpenCV, Haar Cascade, and LBPH Face Recognizer.
- Implemented Face Detection, Face Recognition, Automated Attendance Logging, and CSV-based Record Management for over 50+ registered users.
- Processed live video streams with Real-Time Recognition, Timestamp Generation, and End-to-End Attendance Automation.
- Automated the attendance process, significantly reducing Manual Effort and improving Accuracy.

Co-Pay – AI-Powered Roommate Expense Management Platform — GitHub

Jul 2026 – Present

- Developed a Full-Stack Roommate Expense Management Platform for Shared Expenses and Automated Settlements.
- Implemented AI Voice Expense Entry, WhatsApp Reminders, and QR-based UPI Payments.
- Built secure Analytics Dashboards with JWT Authentication and Expense Insights.

Technical Skills

Programming Languages: Java, Python, JavaScript, SQL

Frontend: React.js, Next.js (Basic), HTML5, CSS3, Tailwind CSS, Bootstrap

Backend & APIs: Node.js, Express.js, FastAPI, Flask, RESTful APIs, JWT Authentication

Databases: MongoDB, MySQL

Software Engineering: API Integration, Authentication, CRUD Operations, Responsive Web Development, Debugging, Software Design Principles

Tools & Platforms: Git, GitHub, Docker, Linux, AWS, Postman, CI/CD, JupyterLab

Core Computer Science: Data Structures & Algorithms, OOPs, DBMS, Operating Systems, Computer Networks

Machine Learning & AI: Large Language Models (LLMs), Prompt Engineering, Retrieval-Augmented Generation (RAG), OpenAI API, LangChain, ChromaDB, Hugging Face Transformers, PyTorch, TensorFlow, Scikit-learn, NumPy, Pandas, Matplotlib, OpenCV

Certifications

• Oracle Agentic AI Certified Foundations Associate — Oracle University	Jun 2026
• AWS Academy Graduate – Cloud Foundations — AWS Academy	Jun 2026

Achievements

- Winner in the Sustain Tech Hackathon among 500+ participating teams
- Solved 400+ Data Structures and Algorithms problems on LeetCode and GeeksforGeeks.
- Built and deployed 10+ AI, Full-Stack, and Software Engineering .projects.
