Professional Summary

Computer Science undergraduate with hands-on experience in software development, debugging, API validation, and web application testing through internships and full-stack projects. Strong understanding of Software Development Life Cycle (SDLC), Software Testing Life Cycle (STLC), Agile methodologies, REST APIs, SQL, Python, Git, and CI/CD practices. Skilled in functional testing, API testing using Postman, debugging, and validating software quality. Passionate about Quality Assurance and delivering reliable, high-quality software solutions

Education

Parul University, Gujarat
B.Tech in Computer Science Engineering

Aug 2023 – Present
CGPA: 7.6/10

Experience

Software Engineer Intern — HackerRank

Jan 2026

- Successfully cleared the HackerRank Software Engineer Intern Certification assessment, demonstrating proficiency in software engineering fundamentals.
- Solved coding challenges involving Data Structures, Algorithms, Problem Solving, and Debugging.
- Demonstrated knowledge of software development principles, code quality, logical reasoning, and efficient implementation techniques.
- Strengthened analytical thinking and programming skills applicable to Software Development and Quality Engineering roles.

Web Developer Intern — InAmigos Foundation

May 2026 – Jun 2026

- Developed and maintained 10+ reusable React.js components, improving UI consistency and application usability.
- Collaborated with developers to test, debug, and validate newly developed features before deployment.
- Performed functional testing across multiple browsers and devices to ensure application reliability.
- Verified REST API functionality using Postman and assisted in identifying integration issues.
- Identified, documented, and resolved UI defects while improving software quality.
- Participated in deployment activities following SDLC and Agile software development practices.

Projects

ResumeFit-AI — GitHub — *Python, Streamlit, Google Gemini API, Supabase*

April 2026 – Jun 2026

- Developed an AI-powered Resume ATS Analyzer using **Python, Streamlit, Google Gemini API, and Supabase** to evaluate resumes against job descriptions, calculate ATS scores, identify missing keywords, and generate AI-based improvement suggestions.
- Designed and integrated **REST APIs** with robust input validation, exception handling, and PDF processing workflows while performing **API testing using Postman** to validate request-response accuracy, error handling, and application reliability.
- Conducted **functional testing**, debugging, and database validation to ensure accurate resume parsing, seamless user experience, reliable backend operations, and consistent ATS score generation across different resume formats.
- Utilized **Git/GitHub** for version control, optimized application performance through systematic debugging, and followed **SDLC, Agile methodologies, and software engineering best practices** to build a scalable and maintainable application.

WanderLust – Accommodation Booking Platform — GitHub — *MERN Stack*

Jul 2025 – Sep 2025

- Developed a full-stack accommodation booking platform using the **MERN Stack**, implementing secure authentication, property listings, advanced search, booking workflows, and responsive user interfaces for an enhanced user experience.
- Designed, implemented, and validated **RESTful APIs** using **Postman**, while performing **manual and functional testing** of authentication, booking workflows, CRUD operations, and business logic to ensure software reliability.
- Verified **MongoDB** database integrity through data validation and backend testing, identified functional defects, resolved frontend and backend issues through debugging, and improved application stability and performance.
- Collaborated using **Git/GitHub**, followed **SDLC and Agile development practices**, and optimized application performance through continuous testing, code reviews, and deployment best practices.

- Developed a real-time AI-based attendance system using **Python, OpenCV, Haar Cascade, and LBPH Face Recognizer** to automate attendance tracking and manage records for more than **50 registered users**.
- Implemented face detection, face recognition, automated attendance logging, timestamp generation, and **CSV/SQLite - based data management**, ensuring accurate and reliable attendance records across multiple user scenarios.
- Performed **functional testing**, data validation, debugging, and edge-case testing to improve face recognition accuracy, eliminate duplicate attendance entries, and ensure stable application performance under different conditions.
- Optimized real-time video processing, maintained source code using **Git**, and followed **software engineering, SDLC, and debugging best practices** to deliver a scalable, efficient, and maintainable attendance management solution.

Technical Skills

- **Programming Languages:** Java, Python, JavaScript, SQL
- **Software Testing:** Manual Testing, Functional Testing, API Testing, Regression Testing (Basic), Smoke Testing (Basic), SDLC, STLC, Test Case Design, Bug Reporting, Debugging
- **API Testing:** REST APIs, Postman, JSON Validation
- **Databases:** MySQL, MongoDB, SQL Queries, Data Validation
- **Frontend:** React.js, HTML5, CSS3, Tailwind CSS, Bootstrap
- **Backend:** Node.js, Express.js, FastAPI, Flask
- **Tools:** Git, GitHub, Docker, Linux, AWS, CI/CD, JupyterLab
- **Core Subjects:** Software Engineering, Data Structures, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

Certifications

- **AWS Certified AI Practitioner** – Amazon Web Services (AWS) Jul 2026
- **Oracle Agentic AI Certified Foundations Associate** – Oracle University Jun 2026
- **AWS Academy Graduate – Cloud Foundations** – AWS Academy Jun 2026
- **Kaggle Python Coder Badge** – Kaggle Jun 2026
- **HackerRank Software Engineer Intern Certification** – HackerRank Jan 2026

Achievements

- **Solved 400+ Data Structures and Algorithms** problems on **LeetCode** and **GeeksforGeeks**, strengthening problem-solving and coding skills.
- Participated in **5+ hackathons** and **won the Sustain Tech Hackathon**, demonstrating strong problem-solving, teamwork, and rapid software development skills.
- Built and deployed **10+ AI, Full-Stack, and Software Engineering projects** using Python, MERN Stack, REST APIs, and Cloud technologies.
- Earned multiple industry-recognized certifications, including **AWS Certified AI Practitioner, Oracle Agentic AI Certified Foundations Associate, and AWS Academy Graduate – Cloud Foundations**.
- Successfully completed the **HackerRank Software Engineer Intern Certification**, demonstrating strong software engineering fundamentals, debugging, and problem-solving skills.
