Professional Summary

Computer Science undergraduate with hands-on experience in **software development, full-stack applications, RESTful APIs, databases, debugging, testing, and deployment**. Proficient in **Java, Python, JavaScript, SQL, React.js, Node.js, Express.js, MongoDB, and MySQL**, with a strong foundation in **Data Structures and Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems, and Computer Networks**. Solved **300+ DSA problems** and built **10+ software engineering, full-stack, and AI projects**. Familiar with **Git, Docker, Linux, AWS, CI/CD, SDLC, Agile development, and collaborative software development**.

Education

Parul University, Gujarat Aug 2023 – Present
Bachelor of Technology in Computer Science Engineering CGPA: 7.6/10

Experience

Co-Founder & Software Developer Jun 2026 – Present
HubDwar Remote

- Co-founded **HubDwar** and contributed to **backend development** and AI-powered products, including a **Resume Analyzer** and **AI Interview System**.
- Developed **backend services and RESTful APIs** using **Python and Node.js**, implementing application logic, **authentication, API integrations, data processing, and database operations**.
- Built **AI-driven workflows** for resume analysis and automated interviews, including candidate evaluation and structured feedback, while using **Git/GitHub** for debugging, testing, and **collaborative software development**.

Web Developer Intern May 2026 – Jun 2026
InAmigos Foundation Remote

- Developed and maintained **10+ reusable React.js components** using **JavaScript, HTML5, and CSS3** for responsive web applications.
- Collaborated with developers to **implement features, debug UI and integration issues, and validate application functionality** across multiple browsers and devices.
- Used **Git and GitHub** for version control and contributed to **testing, debugging, and deployment workflows** following **SDLC and Agile software development** practices.

Projects

Co-Pay – Roommate Expense Management Platform — React.js, Node.js, Express.js, MongoDB, Jul 2026 – Present
CI/CD

- Designed and developed a **full-stack expense management application** using **React.js, Node.js, Express.js, MongoDB, JavaScript, and RESTful APIs**.
- Implemented **shared expense tracking, member contributions, balance calculations, settlement workflows, and CRUD operations**.
- Built secure application workflows using **JWT Authentication** and developed **analytics dashboards** for expense and settlement tracking.
- Integrated **AI voice expense entry, WhatsApp reminders, automated settlements, and QR-based UPI payment** functionality.
- Implemented **CI/CD workflows** to automate application build, testing, and deployment processes for faster and consistent releases.

WanderLust – Accommodation Booking Platform — JavaScript, Node.js, Express.js, MongoDB Jul 2025 – Sep 2025

- Developed a **full-stack accommodation booking platform** with **property listings, search, filtering, authentication, and booking workflows**.
- Designed and implemented **RESTful APIs** for user, property, and booking operations using **Node.js and Express.js**, and performed **API testing using Postman** to validate endpoints, request-response data, authentication, and error handling.
- Integrated **MongoDB** for persistent data storage and implemented **CRUD operations** for application data management.
- Debugged **frontend and backend integration issues** and validated **authentication, listing, and booking workflows**.
- Built **responsive interfaces** using **HTML5, CSS3, and JavaScript** and optimized **database operations** for efficient data retrieval.

ResumeFit-AI – Resume Analysis Platform — Python, Streamlit, Gemini API, Supabase, SQL Apr 2026 – Jun 2026

- Developed a resume analysis application using **Python, Streamlit, Google Gemini API, NLP, Supabase, and SQL** to evaluate resumes against job specifications.
- Implemented **PDF processing, keyword extraction, skill validation, ATS scoring, and job-description comparison** workflows.
- Designed backend workflows with **input validation, exception handling, API integration, and SQL-based database operations** using **Supabase** for storing and managing application data.
- Performed **functional testing and systematic debugging** to improve resume parsing reliability and application stability.
- Used **Git and GitHub** for version control and followed structured **software development practices** throughout implementation.

Technical Skills

- **Programming Languages:** Java, Python, JavaScript, SQL
- **Frontend:** React.js, HTML5, CSS3, JavaScript, Bootstrap
- **Backend & APIs:** Node.js, Express.js, FastAPI, Flask, RESTful APIs, JWT Authentication, CRUD Operations, API Integration
- **Databases:** MySQL, MongoDB, Supabase
- **Tools & Platforms:** Git, GitHub, Linux, Postman, AWS, CI/CD
- **Core Computer Science:** Data Structures Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Certifications & Credentials

- | | |
|--|----------|
| • AWS Certified Cloud Practitioner — Amazon Web Services (AWS) | Aug 2026 |
| • AWS Certified AI Practitioner — Amazon Web Services (AWS) | Jul 2026 |
| • Oracle Agentic AI Certified Foundations Associate — Oracle University | Jun 2026 |
| • AWS Academy Graduate – Cloud Foundations — AWS Academy | Jun 2026 |
| • Kaggle Python Coder Badge — Kaggle | Jun 2026 |
| • HackerRank Software Engineer Intern Certification — HackerRank | Jan 2026 |

Achievements

- Solved **400+ Data Structures and Algorithms problems** on LeetCode and GeeksforGeeks, strengthening algorithmic problem-solving and coding skills.
- Participated in **5+ hackathons**, applying software development, teamwork, problem-solving, and rapid prototyping skills.
- Built and deployed **10+ AI, Full-Stack, and Software Engineering projects** using Python, MERN Stack, REST APIs, databases, and cloud technologies.
- Co-founded **HubDwar** and collaborated with a development team of **7 members** on software product development.
