Professional Summary

Computer Science undergraduate with hands-on experience in **Artificial Intelligence, Machine Learning, Generative AI, Natural Language Processing (NLP), and Computer Vision**. Built AI-powered applications using **Python, FastAPI, ChromaDB, Groq API, SQL, Supabase, RESTful APIs, and OpenCV**. Experienced in developing **Retrieval-Augmented Generation (RAG)** pipelines, LLM-powered applications, Resume Analysis Systems, AI Interview Platforms, and Face Recognition solutions. Strong foundation in **Data Structures and Algorithms, Object-Oriented Programming, DBMS, Operating Systems, and Computer Networks**, with 400+ solved DSA problems and multiple end-to-end AI projects.

Education

Parul University, Gujarat

Bachelor of Technology in Computer Science Engineering

Aug 2023 – Present

CGPA: 7.6/10

Experience

Co-Founder & AI/ML Engineer

HubDwar

Jun 2026 – Present

Remote

- Designed and developed AI-powered applications including an **LLM-based Resume Analyzer** and an **AI Interview Platform** using **Python, FastAPI, Groq API, SQL, and Supabase**.
- Built backend services and **RESTful APIs** for AI applications, implementing authentication, data processing, database operations, API integrations, and scalable backend workflows.
- Developed AI workflows using **Natural Language Processing (NLP), Prompt Engineering, and Generative AI** to automate resume analysis, candidate evaluation, and personalized AI-generated feedback.
- Collaborated with a team of 7 developers using **Git/GitHub**, participated in debugging, testing, code reviews, and software deployment following Agile development practices.

Web Developer Intern

InAmigos Foundation

May 2026 – Jun 2026

Remote

- Developed and maintained **10+ reusable React.js components** using JavaScript, HTML5, CSS3, and Bootstrap for responsive web applications.
- Collaborated with cross-functional teams to implement new features, resolve frontend issues, and improve application usability through testing and debugging.
- Used **Git, GitHub, Postman**, and REST APIs for collaborative development, API testing, deployment, and version control while following Agile software development practices.

Projects

RAG-Based Document Summarization Platform — Python, FastAPI, ChromaDB, Groq API, NLP Jan 2026 – Feb 2026

- Developed a **Retrieval-Augmented Generation (RAG)** based document summarization platform using **Python, FastAPI, ChromaDB, and Groq API** to generate context-aware summaries from uploaded documents.
- Implemented an end-to-end **RAG pipeline** including **document parsing, text chunking, vector indexing, semantic retrieval, and LLM-powered summary generation**.
- Designed scalable **RESTful APIs** for document upload, retrieval, and AI-powered summarization using FastAPI.
- Improved summary relevance through **prompt engineering, semantic search, and context-aware retrieval** while building a modular backend architecture for AI applications.

AI Interview Platform — Python, FastAPI, Groq API, SQL

Jun 2026 – Present

- Developed an **AI-powered interview platform** using **Python, FastAPI, Groq API, and SQL** to automate technical interview evaluation.
- Implemented AI workflows for candidate assessment, question generation, response evaluation, and personalized interview feedback.
- Built backend APIs, authentication, database operations, and scalable AI services for interview management.
- Designed modular AI pipelines using **Prompt Engineering** and LLM workflows to improve interview quality and consistency.

LLM-Powered Resume Analysis Platform — Python, Streamlit, Groq API, SQL, Supabase

Apr 2026 – Jun 2026

- Developed an AI-powered resume analysis platform using **Python, Streamlit, Groq API, SQL, and Supabase**.
- Implemented resume parsing, keyword extraction, ATS score generation, skill-gap analysis, and AI-powered resume recommendations.
- Designed backend workflows with REST APIs, SQL database operations, input validation, and exception handling.
- Integrated Prompt Engineering to generate personalized resume improvement suggestions.

Computer Vision Attendance System — Python, OpenCV, NumPy, Pandas

May 2026 – Present

- Developed a real-time attendance system using **Python, OpenCV, Haar Cascade, and LBPH Face Recognizer**.
- Implemented face detection, face recognition, attendance automation, and CSV-based record generation for 50+ registered users.
- Performed image preprocessing, feature extraction, and real-time video processing for reliable face recognition.
- Improved attendance automation by reducing manual intervention through Computer Vision techniques.

Technical Skills

- **Programming Languages:** Python, Java, SQL, JavaScript
- **Artificial Intelligence & Machine Learning:** Machine Learning, Natural Language Processing (NLP), Generative AI, Prompt Engineering, Retrieval-Augmented Generation (RAG), Semantic Search, Embeddings
- **LLMs & AI Frameworks:** Groq API, Google Gemini API, ChromaDB
- **Computer Vision:** OpenCV, Haar Cascade, LBPH Face Recognizer, Image Processing
- **Backend Development:** FastAPI, Flask, Node.js, Express.js, RESTful APIs, JWT Authentication
- **Databases:** SQL, Supabase, MongoDB, MySQL
- **Cloud & DevOps:** AWS, Git, GitHub, Docker, Linux, CI/CD
- **Tools:** Postman, Streamlit, Jupyter Notebook
- **Core Computer Science:** Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks

Certifications

- | | |
|--|----------|
| • AWS Certified AI Practitioner — Amazon Web Services (AWS) | Jul 2026 |
| • Oracle Agentic AI Certified Foundations Associate — Oracle University | Jun 2026 |
| • AWS Certified Cloud Practitioner — Amazon Web Services (AWS) | Aug 2026 |
| • AWS Academy Graduate – Cloud Foundations — AWS Academy | Jun 2026 |
| • Kaggle Python Coder Badge — Kaggle | Jun 2026 |
| • HackerRank Software Engineer Certification — HackerRank | Jan 2026 |

Achievements

- Solved **400+** **Data Structures and Algorithms** problems on LeetCode and GeeksforGeeks using Java and Python.
- Built and deployed **10+** **AI, Machine Learning, Generative AI, and Full-Stack applications** using Python, FastAPI, REST APIs, SQL, MongoDB, and cloud technologies.
- Co-founded **HubDwar** and collaborated with a team of **7 developers** to build AI-powered software products.
- Participated in **5+** **Hackathons**, developing AI-powered solutions through rapid prototyping, team collaboration, and problem solving.
